

CENTRAX

GAS TURBINES

The Mission Statement of the Gas Turbine Division of Centrax Ltd is:

To produce quality products and installations which meet or exceed customer expectations, in and beyond Europe, and to support them with excellent customer service. This will be achieved within a culture of enthusiasm and continual improvement.

The mission will be implemented using a Quality Management System approved to ISO 9001:2008. To ensure continual improvement, Quality Objectives will be reviewed at regular intervals by senior management and cascaded down throughout the organisation.

The Company will ensure its products and installations comply with all relevant statutory and regulatory requirements.

The Company also recognises its responsibility to employees and the environment. It is committed to employing best practice in health and safety at work, which meets or exceeds national requirements and to maintaining an Environmental Management System approved to ISO 14001.

GAS TURBINE DIVISION OBJECTIVES

In an effort to strive for continual improvement, the following objectives will be adopted:

1. To increase the installed base of Generator Sets in Europe and beyond and to provide maintenance support for those units.
2. To achieve on-time delivery of Generator Sets, in line with contractually agreed dates.
3. To ensure availability of spare engines to cover potential Customer needs.
4. In production of the RR501 Boost Module, to meet or exceed agreed customer targets.
